NAL PROJECT DOCUMENT

1. Report No.	2. Date	3. Security classification
PDSE 8501	January 1985	Declassification
		SECRET

4. Title/Sub-title

Longitudinal stability and control characteristics of
MIG-21 aircraft

5. Authors (Alphabetical) B.S. Bhagawan, V. Parameswaran,
Dr. Rajeswari Ramamoorthy, S.N. Seshadri,
Dr. J.K. Sridhar, C.V. Srinatha Sastry,
Dr. K. Yegnanarayan.

6. Division/Group:	7. Project No.
Systems / Aerodynamics	ID-0-101

8. Type of report,	9. No. of pages, tables,	10. Approved/Copies:
Period covered :	ill., Pages 54	
Final Report :	Tables 8	Head, Systems Div.
	Figures 21	Head, Aero. Div.

11. Sponsoring/Participating agency(s)

H.A.L., Nasik

12. Keywords Stability derivatives, Control derivatives, Eigen values, Transfer function, Aircraft mathematical models, Aircraft modes/responses

13. Abstract (continue overleaf if required)

This document provides the stability and control derivatives data for the MIG-21BIS aircraft in the form readily usable for control system synthesis. Analytical prediction of the longitudinal modes, typical time responses as well as Bode plots in the frequency domain are presented.
